## Medals handed out to Russell House schoolchildren for maths challenge

Five pupils from Russell House were awarded medals in the Primary Maths Challenge

THE Primary Maths Challenge, run by the Mathematical Association, is aimed at children in Years 5 and 6 across the whole country.

It is designed to make pupils think outside the box and encourages rea-

soning skills through solving problems.

This year around 67,000 children took part in the challenge and, nationwide, the percentage of entrants who received a medal was 2

per cent.

At Russell House, 11 per cent of pupils who entered the first round made it through to the final, and all achieved a medal.

Louis, Peter and Sammy received

Silver and Sophia and Elliot Bronze medals.

"We're very proud of our five medal winners, which is a record result for Russell House in the Maths Challenge," said head master Craig

McCarthy.

"We have high expectations for our pupils and they continue to demonstrate their capacity to rise to these expectations and achieve remarkable results."
